PROFESSIONAL SUMMARY

IT Analyst with experience in healthcare quality assurance, Generative AI chatbot and LLM testing, customer-data validation, UI/API testing, and web/mobile regression testing. Experienced in preparing test scenarios, validating chatbot responses, documenting defects in Jira, retesting fixes, and supporting Playwright automation using Cursor and GitHub. Seeking opportunities in Generative AI QA and QA automation.

TECHNICAL SKILLS

Testing: GenAI chatbot/LLM testing, prompt testing, functional and non-functional testing, positive/negative testing, UI testing, API testing, regression testing, test scenario design.
Tools: Cursor AI, Jira, BrowserStack, LangSmith (exposure), Microsoft Copilot, CSA tool for user-detail lookup and IAM account actions.
Programming: Python (Intermediate), R (Intermediate), C (Basic), HTML/CSS (Basic).
Professional: Defect analysis, test evidence, story-based testing, data validation, communication, teamwork, adaptability.

PROFESSIONAL EXPERIENCE

Analyst | Cognizant **11 Jun 2026 – Present**
Hyderabad

- Test spending-account and Identity and Access Management (IAM) workflows through UI, API, and web/mobile testing.
- Perform account and IAM regression testing using BrowserStack and validate user stories against acceptance criteria.
- Use Cursor with a GitHub repository to run Playwright spec files and datasets, investigate failures, fix script issues, and push code changes to the relevant branch.
- Document test evidence and use the CSA tool to retrieve user details and perform IAM actions, including user unregistering and MFA-related troubleshooting when authorized.

Analyst Trainee | Cognizant **10 Jun 2025 – 10 Jun 2026**
Coimbatore

- Validated healthcare customer data for Aetna/CVS and Meritain workflows, reported discrepancies, and closed cases when data was correct; performed manual and selected tool-based automation testing.
- Tested a Cigna claims chatbot by validating prompts and LLM responses across positive/negative and functional/non-functional scenarios.
- Created test scenarios from user stories, logged defects in Jira, retested fixes, performed regression testing, and documented evidence.
- Used LangSmith for exposure to chatbot failure analysis and Microsoft Copilot to assist with test scenarios and defect documentation.

EDUCATION

Artificial Intelligence and Robotics (McsAIR) **9 CGPA**
Aditya Degree College for Women, Rajahmundry 2022–2025

Intermediate – MPC **89%**
Sri Chaitanya Junior College, Rajahmundry 2020–2022

SSC **98%**
The Bodhi School, Rajahmundry 2019–2020

ACADEMIC PROJECTS

Data Analysis Project Using R: Applied statistical methods to academic data and prepared reports and visual presentations. The original resume reports a 20% improvement in data insights.
Bluetooth-Controlled Car Using Arduino: Built a team mini-project using Bluetooth control, C, and Arduino IDE. The original resume reports a 10% reduction in response time.
Vision Assist Lens – Mini Project: Prepared a presentation covering prototype design methodology, functionality, and specifications.

CERTIFICATIONS

- Generative AI – LinkedIn Learning and Google Cloud
- AI and Machine Learning Fundamentals – Infosys Springboard
- Programming Essentials in C – Cisco Networking Academy / LearnTube by Career Ninja
- Python and AI Bootcamp – Microsoft Learn Student Ambassador Program

ACHIEVEMENT & LANGUAGES

Achievement: Participated in Cognizant's vibe-coding event.
Languages: English, Telugu, Hindi (basic conversational)
